Meeting Minutes
New Jersey Geospatial Forum
General Meeting – June 9, 2016

Constituency & Taskforce Reports

- Federal
    - Federal Lidar requirements for FY17 acquisition season must be entered into NOAA Seasketch app no later than June 17, 2016 for consideration. In the case of a 3-4 way overlap or more, funds may be allocated to capture areas of multi-agency need.
    - USGS National Geospatial Program – announcement for FY17 Broad Agency Announcement for lidar project proposals will be released July 25th and due Oct 3rd. Notifications will be made by mid-November. Funding will be allocated with respect to Congressional budget passage or a CR.
- State
    - Andy has taken the position of Deputy Chief Technology Officer and Doug Schleifer will become manager of the Office of GIS.
    - Version 1.0 statewide address points have been released on NJGIN.   Primary source is property tax records and parcel data. If Counties have data to share, please contact Chris Klaube. Feedback and corrections are welcome.
    - The Division of Elections is in the design phase to incorporate GIS into the statewide voter system, which means an update to statewide data voting districts.
    - An RFP will be released on July 1 for next generation 911 implementation. The State will provide network routing of 911 calls into the network, call routing, and identification of call location to the correct call center.
    - The State Division of Taxation is preparing to release a request for quotes for staff training & for tools to assist in automating tax map review. Regulations have been drafted but are on hold. The Division has the discretion to receive tax maps in alternate formats, which would enable them to receive digital submissions. Even if the regulations were changed, submitting digital tax maps would be voluntary and it is expected that there will be a partial adoption of the digital submission.
- County
    - The first County constituency group meeting was held in May, with a good turnout. The next meeting will be in the Fall.
- Boundary Taskforce
    - The first meeting of the taskforce is to be held on June 22nd at 1pm at Mercer County DOT complex. A signup is being circulated via the listserve. Mission statement, goals and objectives will be discussed at the meeting.

Floor Announcements

- 12th Annual Flood Conference: Oct 18-20 at Bally's in Atlantic City
- MACURISA conference: Oct 12-14 in Atlantic City. Register at macurisa.org. Presentations are needed for the GIS techspo.

Annual Showcase of Lightening Talks

Name	Organization	Presentation Title
Matt Lawson	Mercer County	Mercer County Property Information Portal
Andy Pickford	BAE Systems	Remote Sensing Services to Support Incident Management and Homeland Security
Calen Daugherty	Civil Solutions	Customizing the Esri Story Map Application for Integration with Esri Maps for Office
Daniel Waldron	Michael Baker	NJDOT County Route Image and Pavement Data Collection
John Tyrawski	NJDEP	Updating the New Jersey 10 Foot LiDAR Derived Digital Elevation Model
Kyle Heulitt	GIS Masters Penn State	Integrating GIS and Brooklyn Botanic Garden's Filemaker Pro Plant Records Database
Mark Andreychik	Michael Baker	WiM Data Streamer
Dave Kunz	Civil Solutions	Leveraging the Esri Tax Parcel Viewer to Extend your GIS Enterprise
Evan Sherer	NJDEP	Assessing Shorelines to Inform Coastal Restoration
David Braig	JMT Technology Group	Working with 3-D Data
Anton Getz	Michael Baker	Creating a Railroad LRS Database
Bianca Charbonneau	U Penn PhD Candidate	Using GIS, Aerials, & Ground Truthing to Uncover Superstorm Sandy Erosion
